

NATIONAL TEXTILE UNIVERSITY

Department of Computer Science

Week-4 Lab # 1: Computer Programming for Data Sciences (CSC-)

Basic Information		
Objectives	1. Built-in Functions 2. User-Defined	

Built-in Functions

1. Write a function that takes a list of numbers and returns the maximum and minimum values.
2. Write a function that takes a list of numbers and returns the sum and average of the numbers.
3. Write a function that takes a list of numbers and returns a sorted list in ascending order using the built-in sorted() function.
4. Write a function that takes a string and returns the number of characters in the string using the built-in len() function.
5. Write a function that takes a list of numbers and returns a new list where each number is converted to its absolute value using the built-in abs() function.

User-Defined Functions

6. Write a function that takes two numbers as parameters and returns their sum.
7. Write a function that takes a number as input and prints whether the number is even or odd.
8. Write a function that accepts a number and returns its square.
9. Write a function that takes a number and prints the factorial of that number.
10. Write a function that checks whether a number is prime or not.
